PROJECTS

giglandia — giglandia.herokuapp.com

This is a personal project that lets the user find a band to see their tour schedule. A user can sign up or sign in and favorite as many bands as they like! It is written in Ruby, Sinatra, JQuerymobile, Songkick API and Echonest API.

Writefast (Hackathon Winner) — writefast.herokuapp.com

A two-day group hackathon project that helps students create, edit, save, and revise documents.

My area of focus:

- setup routes and implemented sessions in Sinatra
- login authentication and error handling

Prototype Task App — prototype-task-app.firebaseio.com

In this project, I wanted to improve my skills in HTML, CSS and Flexbox. I found digital mockups from InVision and used it to prototype a website.

PROFESSIONAL EXPERIENCE
